

x. How to add story points on the dashboard.

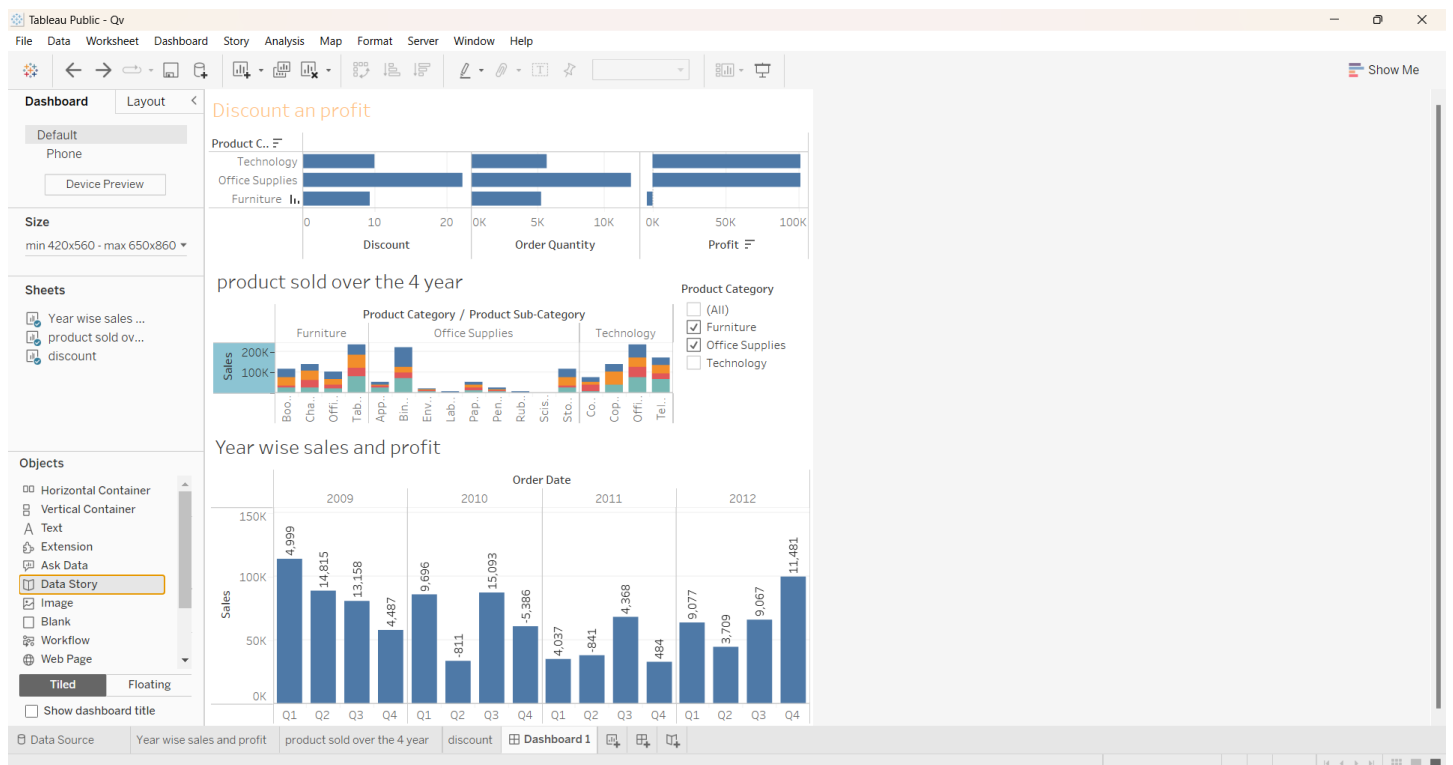

A story is a sheet, so the methods we use to create, name, and manage worksheets and dashboards also apply to stories . At the same time, a story is also a collection of sheets, arranged in a sequence. Each individual sheet in a story is called a story point.

Step 1- connect to the data source.

Step 2- create an entire dashboard.

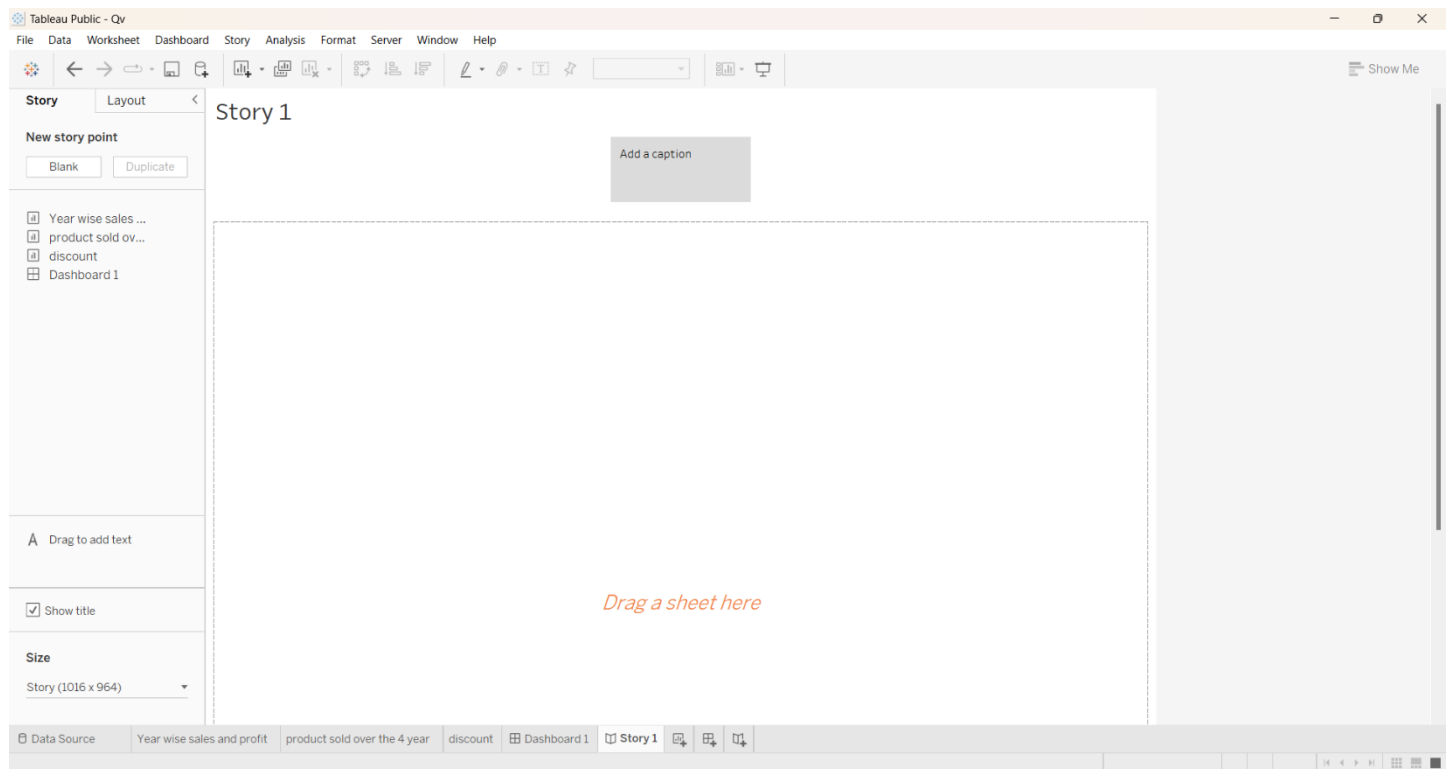

Step 3 - After you Create a Dashboard, we can add the Data Story object to our dashboard to display insights about our viz that are written in natural language. Today, Tableau Data Stories are available for English only. There is no data size limit when creating Data Stories. However, story generation times out after 45 seconds if it's trying to analyse a lot of data.

Step 4- Drag the Data Story object into your Tableau dashboard. If you haven't already, add a sheet to your dashboard to use Tableau Data Stories.

Or

Step 5- Click the New Story tab.

Step 6- drag and drop the worksheets in story panel. And add a short summery.
